

4. OmniTransform AI — Intelligent Process Automation Platform

Technologies: Multimodal AI Pipelines, Phonetic NLP, ElevenLabs Voice AI, Google Cloud BigQuery |

github.com/hrlpavan/omnitransform-ai-resources

- Architected an enterprise IPA platform integrating multimodal document parsing and phonetic entity extraction.
- Developed a neural speech pipeline leveraging ElevenLabs Multilingual v2 Voice AI paired with Chladni resonance acoustic physics visualizers.
- Engineered multi-agent coordination architectures utilizing Google Antigravity SDK and Cloud Composer (Airflow).
