

DEEP-TECH & AVGC INNOVATION

HRL International Private Limited

Democratizing Hollywood-grade visual computing, DaVinci Resolve OpenFX plugins, and on-device AI post-production for millions of creators.

FOUNDER & ARCHITECT

Pavan Kumar Sadashiv

B.E. CSE (AI & ML) • Sahyadri (SCEM)
Mangaluru, Karnataka (Beyond Bengaluru Hub)

SECTOR & INITIATIVE

Deep-Tech / AVGC Sector

Make in India Sovereign Software
Target: GENESIS EIR & ELEVATE Grant

PROVEN TRACTION

2.5M+ Organic Reach

Blackmagic Design Certified
JPMorgan Chase & Deloitte Qualified

The Problem — Critical Industry Bottlenecks

High software costs and disconnected AI workflows are crippling independent creators and regional studios.

01

₹30K+ License Barrier

- Studio-grade VFX & color plugins cost ₹30,000–₹1,00,000 per seat.
- Locks out 95% of indie creators, students, and regional Indian studios.
- Forces heavy reliance on pirated or unstable legacy tools.

02

4K Video Compression Loss

- Mainstream pipelines heavily compress 4K 60FPS high-framerate footage.
- Causes severe motion artifacts, color banding, and sensor dynamic range loss.
- Lack of accessible uncompressed 12-bit DPX frame renderers.

03

Disconnected AI Tooling

- Most AI tools exist as slow, standalone web wrappers with cloud lag.
- No native integration into professional NLE editors like DaVinci Resolve.
- Forces tedious multi-step manual export and upload workflows.

THE SOLUTION

Our Proprietary Product Suite

High-performance, hardware-accelerated software engineered natively for local GPU execution.

OFX PLUGIN FOR DAVINCI RESOLVE

AI Cinematic Haze

- ✔ Native C++ / Apple Metal / CUDA GPU compute.
- ✔ Embedded neural depth AI for real-time volumetric optical haze.
- ✔ Preserves uncompressed 12-bit DPX cinema dynamic range.
- ✔ 100% on-device GPU execution with zero cloud latency.

INSTITUTIONAL CSP SOLVER

InvigiMatrix Platform

- ✔ Combinatorial NP-hard CSP backtracking solver.
- ✔ Smart Batch Planner with dynamic K-Means (k=3) & Bayesian classifier.
- ✔ Zero-framework native Node.js + SQLite ACID transactions.
- ✔ Live institutional deployment at Sahyadri College (SCEM).

AUTONOMOUS AGENTIC STUDIO

OmniTransform AI

- ✔ Sub-75ms streaming neural voice AI synthesis.
- ✔ Autonomous multi-agent workflows for media syndication.
- ✔ High-throughput distributed stream architecture.
- ✔ Built-in client-side code security and anti-tamper shields.

PROVEN RESULTS

Traction, Metrics & Institutional Validation

Demonstrated creator reach, certified technical standards, and live production deployments.

2.5M+

Organic Creator Reach

Driven across active creative channels (@hrlpremiumstudio, @hrlefx) with proven viral viewer retention.

100+ Faculty

Institutional Software Deployed

Live exam scheduling and anti-cheating batch planner deployed at Sahyadri College of Engineering & Management.

100% Certified

Elite Technical & Corporate Standards

Certified by Blackmagic Design (DaVinci Resolve), JPMorgan Chase & Co. (Systems), and Deloitte Australia (Cyber).

0 ms

Cloud Latency & Server Cost

100% local GPU execution via Apple Metal and NVIDIA CUDA shaders with zero recurring server bills.

MARKET POTENTIAL

Market Opportunity — Sizing & Expansion Vectors

Positioned at the intersection of the creator economy and high-growth Indian AVGC sector.

Commercial Business & Revenue Model

A multi-tiered monetization strategy capturing individual creators and enterprise studios.

DIRECT ASSET SALES

Plugin Marketplace

✓

Affordable perpetual licenses for DaVinci Resolve & After Effects plugins.

✓

Priced at ₹1,499 – ₹4,999 (disrupting ₹30,000+ foreign suites).

✓

Targeting freelance video editors and YouTube creators.

✓

High gross margin (>90%) digital software delivery.

RECURRING SUBSCRIPTION

Creator All-Access SaaS

✓

Monthly (₹499/mo) and Annual (₹4,999/yr) plans.

✓

Unlimited access to new monthly VFX packs and neural AI tools.

✓

Predictable recurring MRR and high customer lifetime value.

✓

Continuous automated preset & model updates.

B2B & MEDIA CONTRACTS

Enterprise Retainers

✓

Custom OFX pipeline development for film & ad production.

✓

Viral media syndication contracts via @hrlflix network.

✓

Enterprise software licensing for media academies.

✓

Bespoke algorithmic optimization solvers.

WHY WE WIN

Competitive Moat — Defensible Advantages

Core structural advantages that cannot be easily replicated by web apps or legacy suites.

Native GPU vs. Slow Cloud Wrappers

Direct Metal/CUDA execution on user hardware. Oms latency, zero cloud operational bills, and instant scrubbing without server dependencies.

Certified Hollywood Color Science

Blackmagic Design certified color science preserving 12-bit DPX sensor data with wide-gamut ACEScc dynamic range without clipping.

High-Velocity Zero-Bloat Architecture

Proprietary C++ engines & ACID-safe backends built in-house for maximum throughput without bloated third-party frameworks.

Zero-CAC Creator Distribution Flywheel

2.5M+ active viewer network providing instant viral distribution, zero-cost customer acquisition, and real-time creator feedback loops.

Founder & Leadership Profile

Combining deep algorithmic systems engineering with certified media post-production.

FOUNDER & MANAGING DIRECTOR

Pavan Kumar Sadashiv

- B.E. Computer Science & Engg (AI & ML) — Sahyadri College (SCEM), Mangaluru.
- AI Systems Chief Architect & Full-Stack Systems Engineer.
- Specialized in low-level GPU compute (C++, Metal, CUDA), discrete optimization, and AI agents.
- Location: Mangaluru, Karnataka (Beyond Bengaluru Tier-2 Hub).

Blackmagic Design — Certified User

Validated mastery of Hollywood ACEScc color science, node graphs, and DaVinci Resolve OFX integration.

JPMorgan Chase & Co. — Software Engineering

Accreditation in Kafka distributed streaming, low-latency API design, and transaction integrity.

Deloitte Australia — Cyber Defense & Governance

Accreditation in enterprise threat modeling, perimeter defense, and IP access governance.

Fund Utilization & Milestone Roadmap

Targeting ₹20L – ₹50L non-dilutive grant support (GENESIS EIR / ELEVATE / SISFS).

BUDGET ALLOCATION (₹50 LAKHS)

40% • Core R&D & Plugin Engineering (₹20,00,000)

DaVinci Resolve OFX C++/CUDA engine & ONNX depth AI.

30% • GPU Hardware & Compute Lab (₹15,00,000)

Dedicated testbeds for real-time 4K 60FPS optimization.

10% • IP, Patents & Trademark Filings (₹5,00,000)

Indian Patent Office (IPO) filings & international IP protection.

20% • Pilot Trials & Market Launch (₹10,00,000)

Beta onboarding across Karnataka and production studios.

18-MONTH EXECUTION ROADMAP

★ Months 1 – 6: Alpha Engine & IP Filing

Complete C++/CUDA OFX plugin builds; file provisional patents on neural depth VFX.

★ Months 7 – 12: Closed Beta (1,000+ Creators)

Deploy beta testing to video editors across Karnataka; benchmark real-time 4K FPS.

★ Months 13 – 18: Commercial SaaS Launch

Launch commercial SaaS tier; onboard 50+ studios & achieve ₹50L+ ARR.
