Official Detailed Fund Utilization Plan

Submission for Government Seed Grant / GENESIS EIR / Karnataka ELEVATE 2026 (Idea2POC)

1. Executive Summary of Funding Requirement

HRL International Private Limited is applying for grant funding to accelerate the research, low-level GPU kernel development, on-device AI integration, and commercial launch of its **Next-Generation Cloud-Native Visual Computing & Autonomous AI Post-Production Engine**. The proposed non-dilutive seed funding will be deployed across core R&D, specialized hardware testbeds, intellectual property (IP) protection, and regional pilot deployments.

2. Comprehensive Budget Allocation Breakdown (₹50,00,000)

EXPENDITURE CATEGORY	ALLOCATION	AMOUNT (INR)	KEY DELIVERABLES & MILESTONES
Core R&D & Software Engineering C++, CUDA, Apple Metal, ONNX	40%	₹20,00,000	Engineering native DaVinci Resolve OFX plugin suites, real-time neural depth AI kernels, and 12-bit DPX sensor pipelines.
GPU Hardware & Compute Lab Workstation Rigs & Benchmarks	30%	₹15,00,000	Dedicated Apple Silicon (Metal) and NVIDIA RTX (CUDA) testbeds for 4K 60FPS real-time latency and frame stability testing.
IP, Patents & Regulatory Filings IPO & Madrid Protocol	10%	₹5,00,000	Filing Indian Patent Office (IPO) provisional & complete specifications on volumetric neural depth VFX; international trademarks.
Pilot Trials & Market Launch Creator Onboarding & GTM	20%	₹10,00,000	Onboarding 1,000+ creator beta testers across Karnataka, regional film studio trials, and developer documentation portal.
TOTAL GRANT UTILIZATION		₹50,00,000	100% Non-Dilutive / Equity-Free Grant

3. Scaled Seed / EIR Prototype Grant (₹20,00,000 Option)

Core R&D & Engineering (40% — ₹8,00,000)

Alpha OFX plugin builds, CUDA/Metal shader optimization, and on-device neural depth runtime integration.

GPU Hardware Testbeds (30% — ₹6,00,000)

Apple Silicon and NVIDIA workstation test rigs for latency benchmarking and multi-OS packaging.

IP & Patent Filings (10% — ₹2,00,000)

Indian provisional patent filing for optical neural haze and corporate trademark protections.

Pilot Trials & User Testing (20% — ₹4,00,000)

Closed beta rollout across 500+ freelance video editors and regional production houses in Karnataka.

4. 18-Month Milestone-Linked Tranche Release Roadmap

MILESTONE PERIOD	PHASE & TARGET	KEY TECHNICAL DELIVERABLES	TRANCHE (₹50L)
Months 1 – 6	Phase 1: Alpha Engine & IP	C++/Metal/CUDA OFX plugin prototype; provisional patent filing with Indian Patent Office (IPO).	₹20,00,000 (40%)
Months 7 – 12	Phase 2: Closed Beta Trials	Beta deployment to 1,000+ video editors; 4K 60FPS real-time benchmarking across Apple Silicon & NVIDIA.	₹15,00,000 (30%)
Months 13 – 18	Phase 3: Commercial Launch	Launch commercial marketplace & SaaS tiers; onboard 50+ studios; achieve ₹50L+ ARR run rate.	₹15,00,000 (30%)
